

# DENMARK

## -The Frontrunner in Decentralised Clinical Trials

Denmark is moving full speed ahead to become a global frontrunner in decentralised clinical trials\*.

The concept of decentralised clinical trials involves building the trial around the patients using the advantages of new digital technology. This offers new possibilities for making clinical research more patient-centric and flexible - enabling patients, that feel confident, to participate in clinical trials in the comfort of their home and/or local community.

## DID YOU KNOW?

### Recruitment Methods

An overview of current recruitment methods in Denmark is available through Trial Nation

### Electronic Informed Consent

Denmark supports a digital consent process, both digital communication and eSignature (eIDAS compliant)

### Distribution of IMP

Denmark supports IMP shipment directly from site, hospital pharmacy and depot, to and from trial participants

### Tele- and Video Consultations

Denmark is a highly digitalised country, where video conference is widely used and accepted

### Electronic Data Capture

Denmark has a history of applying digital technologies to support electronic data capture

### General Practice Collaboration

Denmark has an increased focus on supporting clinical trials closer to the patients and accommodate future needs

### Local Service Provider

Denmark has a strong tradition for public-private collaborations e.g. supporting use of local labs, pharmacies and home nursing

### Remote Source Data Verification

Remote monitoring is allowed and the practical detail for implementation is being developed

\*A decentralised clinical trial is defined as "a clinical trial utilizing technology, processes, and/or services that create the opportunity to reduce or eliminate the need for participants to physically visit a traditional research site." By Decentralized Trials Research Alliance

# WHY

## -Place your next Decentralised Clinical Trial in Denmark

In Denmark, the clinical trial ecosystem has demonstrated a readiness for decentralising clinical trials, which is depicted in the latest version of the [EMA DCT recommendation paper](#).

Continuous development of the clinical trial ecosystem and advancement of the framework conditions for clinical trials remains an area of focus in Denmark.

### Political Prioritisation

Denmark demonstrates continuous political prioritisation of life science and clinical trials development

### Strong Digital Infrastructure

Denmark consistently ranks in the top in the [EU Digital Economy and Society Index \(DESI\) report](#)

### Clinical Trials in Denmark

Denmark is in the top ranking of clinical trials per capita

### Regulatory Authorities

The Danish Medicines Agency launched the world's first [DCT guideline](#) and was instrumental in developing the [EMA DCT recommendation paper](#).

### Trial Nation

Denmark offers a single point of entry for clinical trials through Trial Nation. [Trial Nation](#) is a strong public-private partnership that improves the framework conditions for clinical trials.

### Danish DCT Dialogue Forum

Broad interaction between authorities, patients, clinicians, researchers, GCP units, local and hospital pharmacies, and industry
